#### 2023 DRONE SCORECARD

# **MARYLAND**

# **STATE SCORE**

Scores are on a 100-point scale; maximum points are noted in lower-right corners.

## **Factors Helping the State Score**

# **25**

#### **Avigation Easement Law**

Maryland law creates an avigation easement, which means drone operators are protected from nuisance and trespass laws as long as their drones do not disturb people on the ground.<sup>1</sup>

#### **Task Force or Program Office**

The Maryland General Assembly created a temporary task force in 2015.

#### **Law Vesting Landowners with Air Rights**

Maryland law expressly provides air rights to landowners, which reduces litigation risk for drone operators.<sup>2</sup>

#### **Sandbox**

Maryland's drone center at Salisbury Regional Airport offers airspace access to drone companies, is affiliated with the state transportation department, and has a prominent, open invitation to drone companies to test their services.

#### **Jobs Estimate**

Maryland is in the second quintile when it comes to the number of drone-related jobs per 100,000 people.

# **Factors Hindering the State Score**

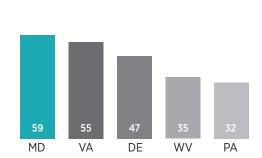

#### **Airspace Lease Law**

Maryland law does not allow public authorities to lease low-altitude airspace above state and local roads. An airspace lease law would allow state or local officials to create drone highways above these roadways.

### **Peer State Comparisons by Score**

Commercial drone readiness scores vary across the nation. To give state leaders and residents insight into how their state compares, we have provided the scores of four state peers. In this case, these peers are selected because of their geographic and political similarities. (The top line illustrates the top score in 2023.)

Arkansas (90)

#### **Definitions**

#### **Airspace Lease Law**

States receive points for having laws that allow state and local authorities to lease airspace above public roadways. These laws allow officials in the future to create drone highways safely, away from airports and residential areas.

#### **Avigation Easement Law**

States receive points for expressly creating an avigation easement, meaning that drones (and planes) are free to fly over private property as long as they do not disturb those on the ground.

#### **Task Force or Program Office**

States receive points if they have an active statewide task force or a program office dedicated to commercial drone services.

#### **Law Vesting Landowners with Air Rights**

States receive points for having a law that expressly vests landowners with air rights. This law reduces litigation risk by putting drone operators on notice that drone flights that are too low or disruptive to landowners are not permitted.

#### **Sandbox**

States receive points if they have dedicated state facilities and airspace for commercial drone testing.

#### **Jobs Estimate**

This score is based on the number of drone jobs per 100,000 people; estimated using ZipRecruiter data.

#### **Notes**

Md. Code Ann., Transp. § 5-1001 (2019).
§ 5-104 (2020).
