IOWA

SUMMARY

On the basis of its fiscal solvency in five separate categories, Iowa ranks 25th among the US states and Puerto Rico for its fiscal health. On a cash basis, Iowa has between 1.57 and 2.51 times the cash needed to cover short-term liabilities. Revenues exceed expenses by 4 percent, producing a surplus of \$250 per capita. Net assets are 22 percent of total assets, and total liabilities are 18 percent of total assets. Total debt is \$3.68 billion. Unfunded pension liabilities are \$36.10 billion on a guaranteed-to-be-paid basis, and other postemployment benefits (OPEB) add \$233 million in unfunded liabilities. These three liabilities are equal to 29 percent of state personal income.

KEY TERMS

- **Cash solvency** measures whether a state has enough cash to cover its short-term bills, which include accounts payable, vouchers, warrants, and short-term debt. (Iowa ranks 27th.)
- **Budget solvency** measures whether a state can cover its fiscal year spending using current revenues. Did it run a shortfall during the year? (Iowa ranks 24th.)
- **Long-run solvency** measures whether a state has a hedge against large long-term liabilities. Are enough assets available to cushion the state from potential shocks or long-term fiscal risks? (Iowa ranks 13th.)
- **Service-level solvency** measures how high taxes, revenues, and spending are when compared to state personal income. Do states have enough “fiscal slack”? If spending commitments demand more revenues, are states in a good position to increase taxes without harming the economy? Is spending high or low relative to the tax base? (Iowa ranks 29th.)
- **Trust fund solvency** measures how much debt a state has. How large are unfunded pension liabilities, OPEB liabilities, and state debt compared to the state personal income? (Iowa ranks 22nd.)
