FLORIDA

SUMMARY

On the basis of its fiscal solvency in five separate categories, Florida ranks sixth among the US states and Puerto Rico for its fiscal health. Florida's fiscal condition is strong. On a cash basis, the state has between 6.53 and 7.52 times the cash needed to cover short-term liabilities. Revenues exceed expenses by 12 percent, producing a surplus of \$440 per capita. Net assets are 11 percent of total assets, and long-term liabilities are 34 percent of total assets. Total debt is \$27.16 billion. Unfunded pension liabilities amount to \$162.54 billion on a guaranteed-to-be-paid basis, and other postemployment benefits (OPEB) add \$15.22 billion in unfunded liabilities. In total, these three liabilities are equal to 24 percent of total state personal income.

KEY TERMS

- **Cash solvency** measures whether a state has enough cash to cover its short-term bills, which include accounts payable, vouchers, warrants, and short-term debt. (Florida ranks 3rd.)
- **Budget solvency** measures whether a state can cover its fiscal year spending using current revenues. Did it run a shortfall during the year? (Florida ranks 7th.)
- **Long-run solvency** measures whether a state has a hedge against large long-term liabilities. Are enough assets available to cushion the state from potential shocks or long-term fiscal risks? (Florida ranks 31st.)
- **Service-level solvency** measures how high taxes, revenues, and spending are when compared to state personal income. Do states have enough “fiscal slack”? If spending commitments demand more revenues, are states in a good position to increase taxes without harming the economy? Is spending high or low relative to the tax base? (Florida ranks 3rd.)
- **Trust fund solvency** measures how much debt a state has. How large are unfunded pension liabilities, OPEB liabilities, and state debt compared to the state personal income? (Florida ranks 12th.)
