NEW JERSEY

SUMMARY

On the basis of its fiscal solvency in five separate categories, New Jersey ranks 48th among the US states and Puerto Rico for its fiscal health. On a cash basis, New Jersey has between 0.63 and 2.00 times the cash needed to cover short-term liabilities. Revenues cover 94 percent of expenses, for a deficit of \$396 per capita. New Jersey is reliant on debt financing, with a net asset ratio of -1.46. Liabilities are 2.1 times the size of total assets, resulting in a long-term liability per capita of \$9,285. Total debt is \$41.84 billion. Unfunded pension liabilities are \$188.40 billion on a guaranteed-to-be-paid basis, and other postemployment benefits (OPEB) are \$66.80 billion. These three liabilities are equal to 58 percent of total state personal income.

KEY TERMS

- **Cash solvency** measures whether a state has enough cash to cover its short-term bills, which include accounts payable, vouchers, warrants, and short-term debt. (New Jersey ranks 38th.)
- **Budget solvency** measures whether a state can cover its fiscal year spending using current revenues. Did it run a shortfall during the year? (New Jersey ranks 49th.)
- **Long-run solvency** measures whether a state has a hedge against large long-term liabilities. Are enough assets available to cushion the state from potential shocks or long-term fiscal risks? (New Jersey ranks 50th.)
- **Service-level solvency** measures how high taxes, revenues, and spending are when compared to state personal income. Do states have enough “fiscal slack”? If spending commitments demand more revenues, are states in a good position to increase taxes without harming the economy? Is spending high or low relative to the tax base? (New Jersey ranks 20th.)
- **Trust fund solvency** measures how much debt a state has. How large are unfunded pension liabilities, OPEB liabilities, and state debt compared to the state personal income? (New Jersey ranks 40th.)
