# NEW MEXICO

## SUMMARY

On the basis of its fiscal solvency in five separate categories, New Mexico ranks 34th among the US states and Puerto Rico for its fiscal health. On a cash basis, New Mexico has between 1.57 and 3.01 times the cash needed to cover short-term liabilities. Revenues exceed expenses by 6 percent, producing a surplus of \$493 per capita. Net assets are 47 percent of total liabilities, and total liabilities are 18 percent of total assets. Total debt is \$3.40 billion. Unfunded pension liabilities are \$42.36 billion on a guaranteed-to-be-paid basis, and other postemployment benefits (OPEB) add another \$3.36 billion to total unfunded liabilities. These three liabilities are equal to 63 percent of state personal income.

## KEY TERMS

- **Cash solvency** measures whether a state has enough cash to cover its short-term bills, which include accounts payable, vouchers, warrants, and short-term debt. (New Mexico ranks 25th.)
- **Budget solvency** measures whether a state can cover its fiscal year spending using current revenues. Did it run a shortfall during the year? (New Mexico ranks 11th.)
- **Long-run solvency** measures whether a state has a hedge against large long-term liabilities. Are enough assets available to cushion the state from potential shocks or long-term fiscal risks? (New Mexico ranks 12th.)
- **Service-level solvency** measures how high taxes, revenues, and spending are when compared to state personal income. Do states have enough “fiscal slack”? If spending commitments demand more revenues, are states in a good position to increase taxes without harming the economy? Is spending high or low relative to the tax base? (New Mexico ranks 48th.)
- **Trust fund solvency** measures how much debt a state has. How large are unfunded pension liabilities, OPEB liabilities, and state debt compared to the state personal income? (New Mexico ranks 49th.)
