# OHIO

## SUMMARY

On the basis of its fiscal solvency in five separate categories, Ohio ranks 11th among the US states and Puerto Rico for its fiscal health. On a cash basis, Ohio has between 4.64 and 6.22 times the cash needed to cover short-term liabilities. Revenues exceed expenses by 5 percent, producing a surplus of \$278 per capita. Net assets are 10 percent of total assets, and total liabilities are 54 percent of total assets, for a total liability per capita of \$3,579. Total debt is \$17.75 billion. Unfunded liabilities are \$262.47 billion, and other postemployment benefits (OPEB) are \$15.46 billion. Total liabilities are equal to 61 percent of state personal income.

## KEY TERMS

- **Cash solvency** measures whether a state has enough cash to cover its short-term bills, which include accounts payable, vouchers, warrants, and short-term debt. (Ohio ranks 5th.)
- **Budget solvency** measures whether a state can cover its fiscal year spending using current revenues. Did it run a shortfall during the year? (Ohio ranks 18th.)
- **Long-run solvency** measures whether a state has a hedge against large long-term liabilities. Are enough assets available to cushion the state from potential shocks or long-term fiscal risks? (Ohio ranks 38th.)
- **Service-level solvency** measures how high taxes, revenues, and spending are when compared to state personal income. Do states have enough “fiscal slack”? If spending commitments demand more revenues, are states in a good position to increase taxes without harming the economy? Is spending high or low relative to the tax base? (Ohio ranks 21st.)
- **Trust fund solvency** measures how much debt a state has. How large are unfunded pension liabilities, OPEB liabilities, and state debt compared to the state personal income? (Ohio ranks 48th.)
