

RANK 45 PENNSYLVANIA

SUMMARY

On the basis of its fiscal solvency in five separate categories, Pennsylvania is ranked 45th among the US states for its fiscal health. On a short-run basis, Pennsylvania has between 71 percent and 136 percent of the cash needed to cover short-term obligations, which is among the lowest in the country. Revenues exceed expenses by 2 percent, and net position improved by \$111 per capita in FY 2015. On a long-run basis, Pennsylvania's negative net asset ratio of 0.27 points to the use of debt and large unfunded obligations. Long-term liabilities are 59 percent of total assets. Unfunded pension liabilities, on a guaranteed-to-be-paid basis, are \$201.17 billion, or 32 percent of state personal income. OPEB is 3 percent of personal income.

KEY TERMS

- Cash solvency** measures whether a state has enough cash to cover its short-term bills, which include accounts payable, vouchers, warrants, and short-term debt. (Pennsylvania ranks 47th.)
- Budget solvency** measures whether a state can cover its fiscal year spending using current revenues. Did it run a shortfall during the year? (Pennsylvania ranks 38th.)
- Long-run solvency** measures whether a state has a hedge against large long-term liabilities. Are enough assets available to cushion the state from potential shocks or long-term fiscal risks? (Pennsylvania ranks 36th.)
- Service-level solvency** measures how high taxes, revenues, and spending are when compared to state personal income. Do states have enough “fiscal slack”? If spending commitments demand more revenues, are states in a good position to increase taxes without harming the economy? Is spending high or low relative to the tax base? (Pennsylvania ranks 21st.)
- Trust fund solvency** measures how much debt a state has. How large are unfunded pension liabilities and OPEB liabilities compared to the state personal income? (Pennsylvania ranks 26th.)
